OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY IN MYSORE, BANGALORE.

Notification dated 16th January 1951.

(HEALTH OF LIVE-STOCK DURING DECEMBER 1950).

In their order of severity, outbreaks of Rinderpest, Black-quarter, Anthrax, Hæmorrhagic septicæmia, Foot and Mouth, contagious goat-Pleuro-pneumonia, Ranikhet, Sheep-pox and rabies were encountered in the State during December 1950. Altogether 144 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 217 villages during the previous month. The number of outbreaks was highest in

Mysore, Kolar and Bangalore Districts, while Chikmagalur, Shimoga and Hassan Districts were least affected. These diseases accounted for 688 attacks, of which 440 succumbed as against 755 attacks and 480 deaths during the previous month. The departmental staff conducted 17,151 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

Prevalence of rinderpest among sheep and goats, was reported from Channagiri and Holalkere Taluks accounting for 79 attacks of which 76 succumbed. Prompt measures of control were undertaken by the Department to check its spread and 92 cattle and 124 sheep and goats in the infected villages and 2,254 cattle and 558 sheep and goats in the 6 neighbouring villages extending over a radius of three miles were protected against the disease. The disease appeared to be well under control at the end of the month under report.

Prevalence of an obscure disease characterised by Gastro-entritis among cattle and buffaloes in Hassan and Chikmagalur Districts was reported during the month. The research staff of the Department who were promptly deputed to investigate its occurrence protected 539 animals during the month in these districts against the disease.

Diseases caused by internal parasites were reported from 92 villages resulting in 68 deaths, as against 93 villages accounting for 62 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 5,781 animals, as against 4,162 animals during the previous month.

The rest of the live-stock remained free from diseases during the month and, fodder and water were generally available throughout the State.
